

MUHAMMAD USMAN HAIDER

Mobile Application Developer

Islamabad, Pakistan | +92 3038800424 | Email | LinkedIn | GitHub | Portfolio

Summary

Flutter Developer specializing in building scalable, production-ready cross-platform mobile applications using Flutter and Dart. Experienced in Firebase ecosystem, REST API integration, real-time systems, and Clean Architecture. Strong background in full-stack development with Node.js and Python backends. Skilled in state management (Provider, River-pod), performance optimized mobile solutions for Android and iOS.

Skills

Mobile Development:

- Flutter, Dart, Material Design, Cupertino Widgets

Backend & APIs:

- RESTful APIs, Node.js, Express.js, Python (Flask), WebSocket, Google Maps API.

Databases & Cloud:

- Firebase (Fire store, Authentication, Fire Storage, Firebase Cloud Messaging), MongoDB

Integrations & Tools:

- Git, GitHub, GitLab, Postman
-

Work Experience

TeraBit IT, Islamabad — Mobile Application Developer

June 2026 - PRESENT

- Developed cross-platform mobile applications using Flutter, translating UI/UX designs into pixel-perfect, responsive interfaces for iOS and Android.
- Integrated Firebase backends, establishing secure authentication flows, real-time data synchronization, and reliable API connections.
- Applied state management best practices and maintained clean, modular architecture to ensure scalability, code reusability, and long-term maintainability.

Flutter Developer (Part-Time) | June 2026 – Present

- Provide ongoing support and maintenance for production Flutter applications by diagnosing and resolving bugs.
- Troubleshoot and fix production issues related to UI, application logic, API integrations, and performance.
- Implement minor feature enhancements and ensure application stability through regular updates.

Flutter Developer Intern | April 2026 – June 2026

- Crafted a cross-platform mobile application using Flutter by integrating with an existing Node.js backend, extending platform accessibility to mobile users.
- Established secure authentication flows and REST API integrations, improving login reliability and reducing authentication errors by ~15%.
- Utilized state management and optimized performance, reducing app load time by ~20% and ensuring a smoother user experience.
- Contributed to feature development and improved application workflows while maintaining clean and modular architecture.

Projects

● **MedCon – Healthcare App**

GitHub

- Engineered a cross-platform healthcare application serving multiple user roles (patients and doctors).
- Built RESTful APIs using Node.js and Express.js for chat systems, SOS alerts, and community modules.
- Integrated Python (Flask) backend for AI-based disease detection and personalized care modules.
- Applied Clean Architecture principles to ensure modular, scalable, and maintainable codebase.

● **Move-Ia – Cab Booking App**

GitHub

- Developed a ride-booking mobile application with dynamic UI and real-time trip updates.
- Designed REST APIs for ride booking driver–rider matching, fare calculation, and trip lifecycle management.
- Incorporated Google Maps API for route visualization and live location tracking.

● **Food Delivery App**

GitHub

- Created a Flutter-based cross-platform ordering system.

- Built backend services in Node.js for order assignment, status tracking, and admin dashboards.
 - Blended Google Maps API for delivery tracking and route optimization.
-

Education

Bachelor of Science in Computer Science

2022–2026

COMSATS University Islamabad (CUI), Islamabad
